AMENDMENT NO. 1 OFFERED BY MR. ROTHMAN

Mr. ROTHMAN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 1 offered by Mr. ROTHMAN: Page 45, add after line 25 the following:

SEC. 311. Of the amounts made available in this Act for the Chief Administrative Officer

of the House of Representatives and the amounts made available in this Act for the Architect of the Capitol for the item relating to "HOUSE OFFICE BUILDINGS", an aggregate amount of \$75,000 shall be made available for the installation of compact fluorescent light bulbs in table, floor, and desk lamps in House office buildings for offices of the House which request them (including any retrofitting of the lamps which may be necessary to install such bulbs), consistent with the energy conservation plan of the Architect under section 310 of the Legislative Branch Appropriations Act, 1999.

The CHAIRMAN. Pursuant to House Resolution 213, the gentleman from New Jersey (Mr. ROTHMAN) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. ROTHMAN).

Mr. ROTHMAN. Mr. Chairman, I yield myself such time as I may consume.

First, let me thank the gentleman from North Carolina (Mr. TAYLOR) and the gentleman from Virginia (Mr. MORAN) as well as staff members Liz Dawson and Mark Murray for allowing me to bring this amendment forward and for working with me to make this possible.

Mr. Chairman, I am offering an amendment today that is quite simple. It would provide sufficient resources from existing funds to allow House Members to request the installation of energy-efficient compact fluorescent light bulbs in their offices.

Some may say, well, that sounds pretty trivial. Well, if saving money for the taxpayers is trivial, if saving energy is trivial, then maybe so. But I think not. I think that this is important and an important first step. For example, this compact fluorescent light bulb that could be used in the Members' offices, at their request, saves about \$3.60 per light bulb per year. Now, we have got three or 4,000 light bulbs in the Members' offices. These new light bulbs will also last 20 times longer than regular light bulbs. So not only will we save a lot of money on the energy that we will not be consuming with these new bulbs, they will last 20 times longer, which means we will be buying between 50 and 100,000 less light bulbs over the course of 10 years, and we will not have to divert attention from the House maintenance staff to this task of changing light bulbs, and they can go on and do the other important work that they are doing.

Let me just say this. It is also, frankly, an indication that the House of Representatives is very much concerned about saving energy. This builds on the 1998 initiative of this Congress to install energy-saving fixtures where we can. As a result of that initiative, the Capitol complex is using nearly 31 million kilowatt hours less than before, a 10 percent decrease in power usage.

Let me add two other points: one is that if we continue in this direction, we can avoid having to construct new
